

Adopt-A-Part

The University of Kentucky Solar Car Team is an independent, student-led organization that operates on the campus of the University of Kentucky. With a large and active student body, the team works during the school year to design and construct solar vehicles which are used in STEM outreach and to compete in national solar car competitions such as the Formula Sun Grand Prix and the American Solar Challenge. The team is currently fundraising in order to design and build the next generation vehicle, "Gato Del Sol VI". This will not be possible without your support!

Your generous donations will allow the team to purchase vital parts for our car, including:

- Battery Cell: \$25**
- Solar Cell: \$100**
- Tire: \$150**

To make a contribution and receive a tax-deductible receipt, please cut off the bottom of this form and mail it in to:
